

# Efstathios Tsanidis

## Full Stack Developer

☎ 015750702661 @ efstathiostsanidis@outlook.com 🌐 [efstathiostsanidis.vercel.app](https://efstathiostsanidis.vercel.app) 📍 Kamen

### EDUCATION

#### Full Stack Web Development

neufische GmbH

2025 - Present

- Intensive training in modern frontend development (React, Next.js, JavaScript)
- Built multiple responsive web applications using real-world workflows
- Gaining experience with version control systems such as Git/GitHub
- Developed skills in version control, testing, and API integration

#### Computer Service and Repair

Fernschule Weber

2023 - 2024

- Learned hardware diagnostics, OS installation, and system maintenance
- Developed structured problem-solving and technical troubleshooting habits

### EXPERIENCE

#### Warehouse Associate

Amazon 2020 - 2025 Werne, Germany

- Improved daily workflows by identifying errors and optimizing small processes
- Used structured problem-solving to handle unexpected issues quickly
- Worked in coordinated teams, mirroring agile-style collaboration
- Built strong habits of consistency, reliability, and meeting strict KPIs

### PROJECTS

#### Art Gallery App

Technologies: Next.js, React, styled-components, JavaScript, SWR, LocalStorage, Jest, Testing Library

- Implemented data fetching and caching with SWR for a responsive UI
- Built dynamic detail pages with Next.js routing
- Developed a "Favorites" system using LocalStorage for persistent data
- Added a full comment system with custom hooks and LocalStorage syncing
- Created reusable UI components (Gallery, Spotlight, Favorites, Comments)
- Built clean responsive layouts with styled-components
- Implemented unit tests with Jest + Testing Library for key components

#### Lord of the Rings Volumes App

Technologies: Next.js, React, styled-components

- Built dynamic routes for each LOTR volume using Next.js page generation
- Styled responsive pages with styled-components and props-based theming
- Implemented reusable components and flexible layout using React + flexbox
- Added smooth hover animations, transitions, and polished UI features
- Designed mobile-first responsive layouts for all screen sizes

#### Rick & Morty App

Technologies: JavaScript, REST API, HTML, CSS

- Implemented data fetching with the Rick & Morty API using async/await
- Built dynamic UI components via DOM manipulation
- Implemented filtering, search, and character rendering logic
- Strengthened understanding of API integration and asynchronous JavaScript

### SUMMARY

Motivated Full Stack Developer with a strong focus on modern frontend development using React, Next.js, JavaScript, and responsive UI design. Experienced in building interactive web applications, integrating REST APIs, and working with component-based architecture and state management. Brings a structured problem-solving mindset, clean coding habits, and a reliable work ethic developed through hands-on projects and real-world teamwork. Driven to create user-focused interfaces and continue growing in professional frontend engineering environments.
